

Procedure:	Timeshee	et	
Procedure #	1006		
Rev. #	4	Approved bv:	Robin Taber
Effective:	4/20/15	29.	

#### Purpose and General Instructions:

- 1. This procedure establishes the preparation and submission of Timesheets by Gemini Technologies, Inc. employees.
- 2. This procedure applies to all Gemini Technologies, Inc. employees. The procedure provides guidance for time-keeping of labor and if applicable other paid time off hours.
- 3. Employees are responsible for their own personal time record.
- 4. The employee certifies the accuracy and completeness of this time record when their signature is electronically affixed to the timesheet.

#### Definitions

None

#### Procedure:

The following procedures apply to the distribution and completion of Timesheets:

#### Distribution of Time Sheets:

- *a)* Human Resources will notify the Accounting Department to set up newly hired employees in the Electronic Timesheet system. The Accounting Department will send the new hire instructions on how to access & log on to their Electronic Timesheet.
- **b)** Employees will be able to access their Electronic Timesheets from any computer with internet access. They will be required to update their passwords on a regular basis.
- *c)* The Accounting Department will make sure each weekly period's Electronic Timesheets are available & accessible to employees in a manner that will ensure that each employee's work data is recorded and available for submission/inspection on a timely basis.

#### Completion of Timesheets:

- *a)* An employee should charge the appropriate charge numbers according to the work they performed. Your supervisor will give you an Authorization to Charge Summary with your appropriate charge number(s) for the work to be performed.
- *b)* The Electronic Timesheet system is updated weekly by the Accounting Department to ensure the appropriate charge numbers are available for each employee to charge their time correctly.
- c) For detailed instructions on how to fill out your Electronic Timesheet see below for Appendix 1: How to Complete an Electronic Timesheet
- *d)* Employees will enter their time at the end of each working day (but no later than the morning of the next work day) to show all hours worked and the distribution of hours worked as either direct labor, indirect labor, or other categories as applicable. Non-exempt, hourly employees who work part-time can leave the days they do not work blank (i.e., they do not have to enter "zeroes" on the days they do not work at all); however, they must record any hours on days they DO work at the end of that day (or no later than the morning of the next work day).
- e) All time will be recorded in hours and half-hour increments (nearest half-hour); for example, 6.5, 4.0, 5.5, etc. Occasional interruptions of less than half-hour are considered to be a "non event".
- *f*) Employees are not authorized to enter time for a date in the future except in the following two instances:
  - i. An employee may charge paid time off for a date in the future if the employee has accrued the necessary paid leave hours to be taken.
  - ii. An employee may charge a company-approved holiday for a date in the future.
- *g)* If an employee does not work for the entire week he/she will need to enter zeros for every day not worked and then sign their timesheet.
- *h*) Employees, after completing their timesheets, will sign their timesheet electronically, certifying that they have actually worked the indicated number of hours on the charge numbers recorded.
- i) An employee should enter the hours he/she worked for the day. For example, if an employee worked 10 hours on Monday and 6 hours on Tuesday, the employee's timesheet should show 10 hours on Monday and 6 hours on Tuesday as opposed to 8 hours for Monday and 8 hours for Tuesday.
- *j)* Any changes that may occur after submission must be made in accordance the Timesheet Revision Section of this document.

#### **Entering Timesheets for Absent Employees**

- If an employee, due to extenuating circumstances (sickness, travel, etc.) is unable to complete their timesheet, then the supervisor will complete and sign the timesheet for the employee. The supervisor should coordinate with the employee to ensure that the hours actually worked are reflected accurately and the proper charge numbers are charged.
- When the employee returns to normal duty the employee must logon to their electronic timesheet and review the timesheet completed by your supervisor to make sure that:
  - the hours actually worked are reflected accurately
  - They are charged to the proper charge number(s)
  - Then sign the timesheet in the Employee signature box. It will overwrite your supervisor signature (which appears in red). Make revisions if necessary and ask supervisor to approve your revisions, if applicable.

#### Approval of Timesheets:

- *a)* Upon receipt of a timesheet, which has been completed and signed by an employee in their area of responsibility, the immediate supervisor will:
  - a. Audit the timesheet for completeness, accuracy, and distribution of hours worked.
  - b. Coordinate any changes with the employee who completed the time sheet and both will sign any changes. *(See "Timesheet Revisions" below.)*
- b) Indicate their approval and certification by signing the timesheet in the supervisor space on the time sheet after verifying the accuracy and authenticity of the completed timesheet. (See Appendix 2: Instructions on How to Approve an Electronic Timesheet below.)
- *c)* In the absence of an employee's immediate supervisor, the backup supervisor should approve the employee's timesheet.
- *d*) The supervisor must review and approve any corrections to an employee's timesheet.

#### Certification of Timesheets

Certification of the timesheets by the employee and the supervisor indicates an honor bound commitment as to the accuracy of hours worked. To knowingly falsify such data is a serious matter subject to disciplinary action.

#### Timesheet revisions:

 <u>Timesheet Revisions</u>: Employees may revise timesheets before or after the supervisor approves. For detailed instructions on how you make a timesheet revision *see below for Appendix 3: How to Complete a Timesheet Revision.*

#### Compliance

- *a*) All employees must be thoroughly familiar with the responsibilities and obligations concerning timesheet reporting.
- **b)** The review and working knowledge of this procedure will assure Gemini's successful compliance with the legal constraints imposed upon defense contractors by the Federal Government.
- *c)* Each employee is responsible for the accuracy and completeness of personal time records. This accuracy is certified by the employee's signature.
- *d)* This time record becomes the legal document by which the Accounting Department is authorized to make salary and wage disbursements and is also the basis for contract customer billings.
- *e)* Upon hire and once per year all current employees will receive a Timesheet Review and Timesheet Revision presentation from the Accounting Department. All employees will be required to sign & return Form 1006.1 Timesheet Review Acknowledgement, certifying that they have reviewed & understand the Timesheet Review and Timesheet Revision presentation.
  - Timesheet & DCAA Floor Check training sessions: Once per year and every month for new hires, the Accounting Department will conduct a training session which will go over the Timesheet Review & Timesheet Revision presentation (see (e) above) & DCAA Floor Checks. This training program will be offered either in person or over the telephone. The training session will last approximately 15 minutes.
  - 2) The training will cover proper timekeeping procedures (per this procedure #1006), the penalties for knowingly mischarging time, and awareness of periodic unannounced internal and government audits (DCAA Floor Check) of Gemini's timekeeping procedures.
  - 3) Employees are required to attend these Training sessions within 30 days of hire and after that annually. The annual training session will be announced at least a week in advance, and several times and locations will be held to make the sessions reasonably accessible to all employees. Attendance will be logged and kept on file.

#### Audit Functions

- *a*) A random sample of employee timesheets will be verified with respective employee and authorized supervisor to confirm labor controls.
- *b)* Random floor checks will be conducted to validate adherence to Gemini timekeeping policies and procedures.

*c)* Random timesheets will be pulled to verify the accuracy of data being inputted / imported into the accounting system.

*Employees should be aware that their supervisor and the accounting department can access their electronic timesheet at any time to perform these random floor checks.* 

#### **APPENDICES:**

Appendix 1 – Time & Expense – How to complete an Electronic Timesheet Appendix 2 – Time & Expense – How to Approve an Electronic Timesheet Appendix 3 – Time & Expense – How to Complete a Timesheet Revision

#### **ATTACHMENTS:**

Signature Hyde, Nina (005137)				Leave Nea West Day	Approval Aletich-Harvey, Kimberly A. (005117)

19. Once you approve one timesheet it will automatically go to the next one.

20. When you are finished approving all timesheets, logout of the system by clicking on logout icon at the top right side of the timesheet. (Red Arrow)

NOTE: if you have rejected any timesheets, once the employee notifies you that they have made the required changes, you will need to repeat this procedure to approve only the previously rejected timesheets – after Step 12 (above), all your employees should show "Approved" except for the one(s) previously rejected – you can click only on the box beside that employee's name to approve only that timesheet this time.

### Appendix 3: Time & Expense Instructions on How Complete a <u>Timesheet Revision</u>

#### How to revise Timesheet Before or After Supervisor Approval

- 1. Before or After you save &/or sign your timesheet or your supervisor has approved you have the capability to revise your timesheet by following the Steps listed below:
  - a. Step 1: Log into your timesheet and scroll to the week that you need to revise a charge code or hours.
  - b. Step 2: If you forgot to enter hours on a day(s)
    - i. Click on the day(s) that needs to be revised and enter the appropriate number of hour(s).
    - ii. Save timesheet
    - iii. Complete Revision Explanation
    - iv. Sign Timesheet
  - c. Alternative Step 2: If you made a wrong entry (e.g., charged 8 hours to Code X but you realize later you should have charged Code Y based on the work performed) therefore you need to revise the hours that are charged to one or more charges :
    - i. If the appropriate charge code does not exist yet, add the appropriate charge code to the next available line
    - ii. Enter appropriate hours in appropriate charge code
    - iii. Adjust the incorrect hours in the wrong charge code
    - iv. Save Timesheet
    - v. Complete Revision Explanation
    - vi. Sign Timesheet

#### How to revise a Timesheet After Timesheet has been Processed

- 2. If you need to make changes after your timesheet has been Processed (status box located in top right hand corner of screen) you need to notify your supervisor who will notify the Finance & Administrative Department to have your timesheet reopened. After you have been notified that your timesheet is now open you have the capability to revise your timesheet by following the Steps listed below:
  - a. Step 1: Log into your timesheet and scroll to the week that you need to revise a charge code or hours.

b. Step 2: In the next available line click on the Contract/WBS or Account box (whichever is applicable) and select the appropriate charge number that needs to be revised. Or if an entire line needs to be revised you may click on the box to the left of the line to highlight it. You will then click the Reverse line button.

c. Step 3: Enter negative hours to correct the erroneously entered hours.

gemi

- d. Step 4: In the next available line click on the Contract/WBS or Account box (whichever is applicable) and select the appropriate charge number that needs to be added.
- e. Step 5: Enter the appropriate hours using a positive number.
